LODZ (ŁÓDŹ) – CITY IN CENTRAL POLAND
HAS THE OLDEST POPULATION AMONG THE
LARGEST CITIES IN POLAND

- Science centres in Lodz - among others
Medical University of Lodz - conduct intensive
research concerning situation of the elders
- Main research trends: health factors, social
protection, social inclusion, active aging,
healthy life style

MEDICAL UNIVERSITY OF LODZ THE LARGEST MEDICAL SCHOOL IN POLAND

Carries out research in the field of:
health state of the oldest, social and
economical risk factors in old
age, determinants of quality of life,
health effects of unemployment in
older productive age, social capital in
a gerontological perspective

from the latest research...

HEALTH STATUS AND QUALITY OF LIFE OF THE LONG-TERM UNEMPLOYED IN OLDER PRODUCTIVE AGE

- Employability of people in older age groups

THE SURVEY ON UNEMPLOYED PERSONS WAS
CONDUCTED BY MEDICAL UNIVERSITY OF LODZ IN
2009 AND 2010

- The analysis revealed that the time of unemployment is linked with deterioration of mental health and quality of life.
- Improvement of quality of life and mental health can be achieved by: economic status improvement, strengthening of self esteem and ability to work, counteraction to social exclusion, physical activity increasment and preventing from the accumulation of unemployment in household.
